

Eurolaite Oy  
Helsinki  
Finland

Date: 14.05.2013

EB Elektro AS appoints Eurolaite Oy as it's agent for the Finnish market.

EB Elektro and Eurolaite Oy have signed an agent contract for the Finnish market. Eurolaite will promote and sell EB Elektro's products in the Finnish market. The specific product range will consist if equipment from 72,5 kV to 420kV.

This comprises the following products:

Porcelain insulators  
Disconnectors  
Transformer equipment  
Transformer monitoring equipment

EB Elektro AS supplies equipment for different applications from 11kV to 420 kV. This includes different applications for the tough environment we have in the Nordic countries.

Our equipment is installed in the coldest places in Norway where there are heavy ice conditions, but also under some of the warmest conditions in Africa. The equipment is also installed in climates that have high humidity and salty conditions near the North the sea.

EB Elektro look forward to cooperatiing with Eurolaite.

Best regards
